

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextbooks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Please provide comments on any aspect of the subject matter of this textbook:

- Very solid traditional textbook approach to the principles of accounting concepts. The book has financial concepts in 17 chapters. I prefer sequencing to start with big picture financial statement use before drilling into transaction analysis. This book jumps into transaction analysis in the beginning.
- Each chapter starts with a connection between the student and a potential career or role in accounting.
- This textbook has a student workbook available for download for 9 dollars from freeloadpress. This is extremely reasonable and includes solutions and exercises. It appears that instructor solution manual and test bank are also available from textbookmedia.

Accounting principles are the building blocks for GAAP. All of the concepts and standards in GAAP can be traced back to the underlying accounting principles. Some accounting principles come from long-used accounting practices where as others come from ruling making bodies like the FASB. It's important to have a basic understanding of these main accounting principles as you learn accounting. This isn't just memorizing some accounting information for a test and then forgetting it two days later. These principles show up all over the place in the study of accounting. Each business should account for its own transactions separately. Going Concern Concept. Going Concern Concept "states that companies need to be treated as if they are going to continue to exist.
