The path to understanding diabetes starts here. No matter where you are in your fight, here's where you need to be. Type 2 diabetes is the most common form of diabetes and it means that your body doesn't use insulin properly. And while some people can control their blood sugar levels with healthy eating and exercise, others may need medication or insulin to help manage it. Regardless, you have options and tools, resources, and support to help you fight. In people with diabetes, high levels of sugar in the blood damage blood vessels and nerves, frequently without obvious symptoms. This can cause heart attacks, kidney failure, and other health issues if not treated properly. In type 2 diabetes, insulin is no longer effective at lowering blood sugar, referred to as insulin resistance. Primary Symptoms of Diabetes. Potential Causes of Diabetes and Related Health Concerns. Type 1 Diabetes is an Autoimmune Disease. Type 2 Diabetes and Insulin Resistance.
